

Fracture Liaison Service Database annual report (2026)

Steps to fracture liaison service effectiveness: importance of treatment recommendations

2023 and 2024 health inequality maps for England and Wales

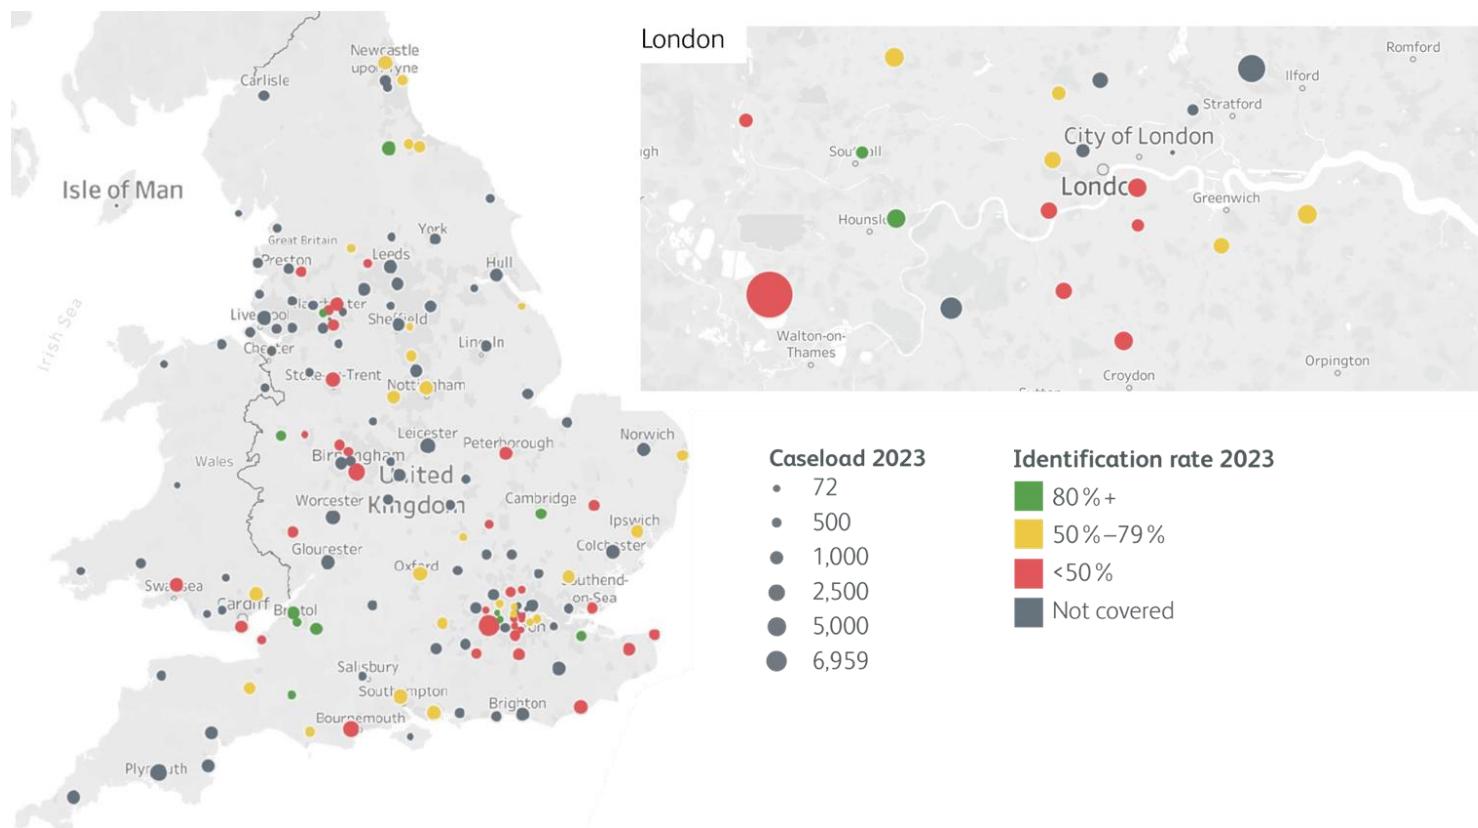

Fig 1. Map of England and Wales showing the expected size of the local fragility fracture population and achievement of case identification in 2023. The estimated expected caseload for FLSs registered to the FLS-DB is derived from the NHFD website on a yearly basis, by multiplying the number of hip fractures from the National Hip Fracture Database in one calendar year by 5.

Appendix B

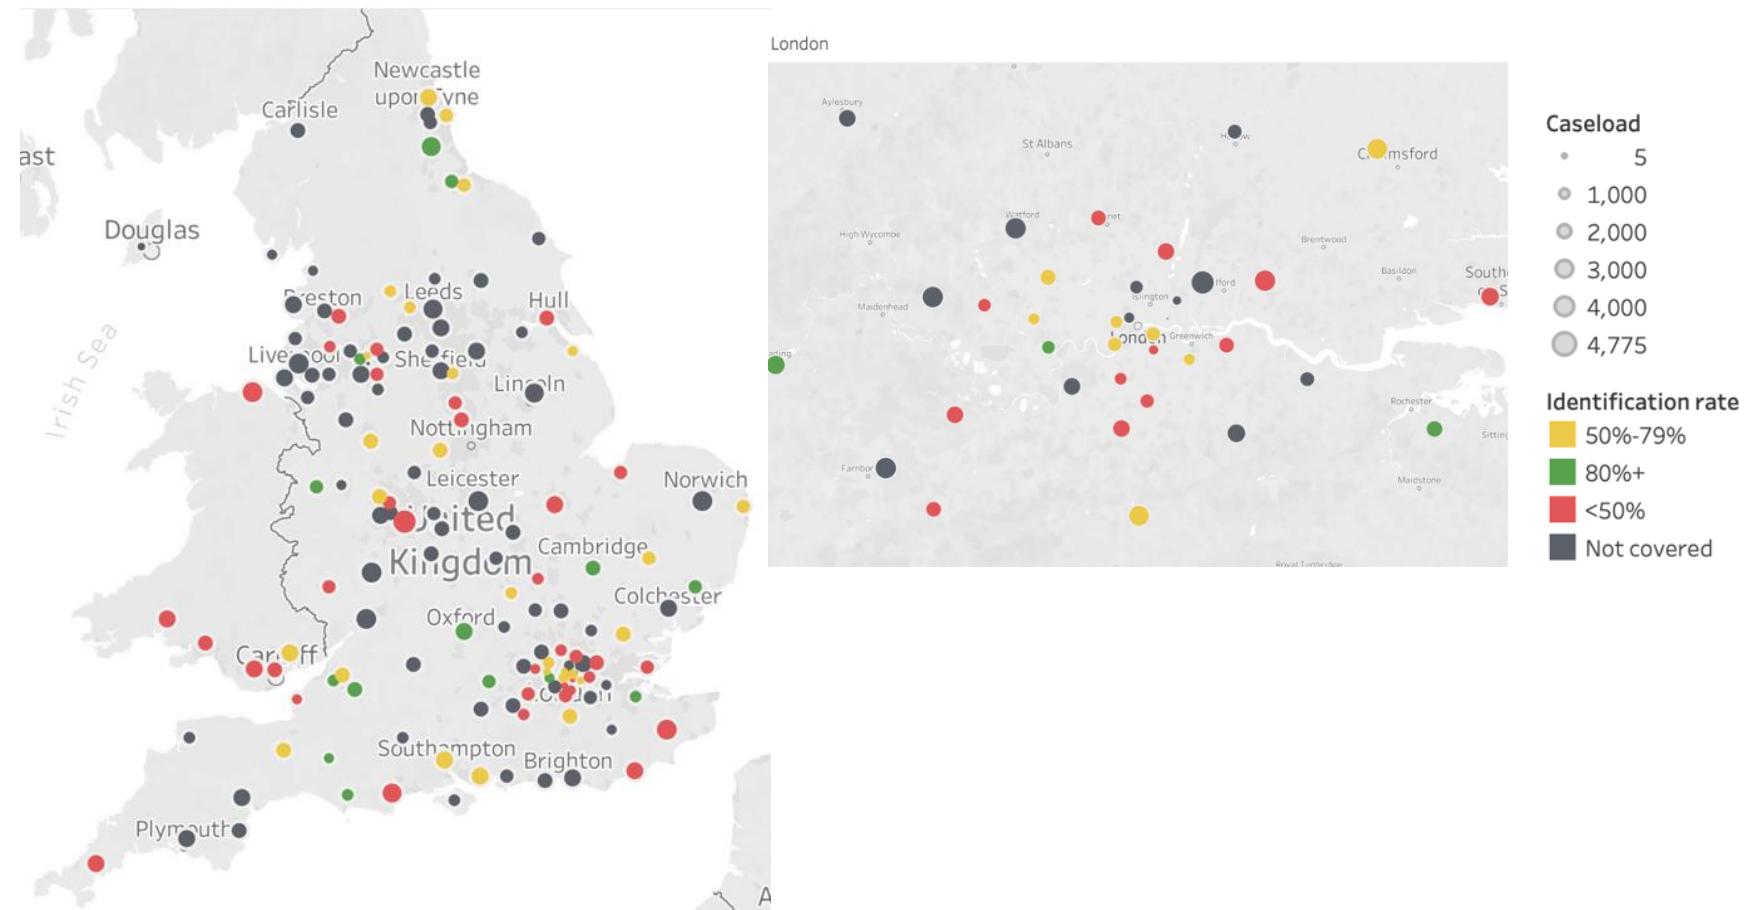

Fig 2. Map of England and Wales showing the expected size of the local fragility fracture population and achievement of case identification in 2024.
