

Green endoscopy: actions you can take today

- > **Start the conversation** – share ideas, ask questions, reflect, ask ‘what can I do to be more sustainable today?’
- > **Become a green champion** by getting in touch with the sustainability lead at your hospital.
- > **Join the Endoscopy Sustainability Network**, run by the Centre for Sustainable Healthcare
- > **Start a green endoscopy board** – fill a display board with relevant posters and information on projects currently being undertaken.
- > **Reduce, reuse, recycle.**
- > **Consider waste management** and the big four (easy to avoid single-use plastics):
 - Cups – Bags – Bottles – Straws
- > **Start a quality improvement project** to help improve sustainable healthcare.
- > **Reach out to local charities** and see if there are any potential sustainability collaborations.
- > **Campaign for change.**
